Strategic Map 2014 - 2019

Build a dynamic and multifaceted library integrated into University learning and research

Optimize access to information
- Determine campus information needs
- Guide campus and community to needed information
- Sustain collections that support learning and research
- Provide technologies for information discovery and use
- Enhance convenience of access

Advance transformative teaching and learning
- Integrate library more fully into curriculum
- Implement program of information skills across the curriculum in collaboration with academic faculty and departments
- Develop repertoire of teaching methods and information content
- Advance teaching of primary source materials

Enhance strategic partnerships
- Collaborate with students in library planning
- Partner with faculty to integrate library in teaching and research
- Work with University Advancement to increase donor contributions
- Pursue campus partnerships that support strategic priorities

Design a facility that enhances learning and research
- Implement a comprehensive long-term space plan
- Enhance efficiency and sustainability of spaces and practices
- Improve the library’s appearance, comfort, and functionality
- Engage in collaborations that co-locate services in and out of library

Encourage library faculty and staff excellence
- Nurture a supportive, just, equitable library culture
- Recruit and retain diverse, qualified, engaged faculty/staff
- Support continuous and strategic development of faculty and staff
- Support faculty research and creative activity

Align library resources with strategic priorities
- Exercise efficient, effective stewardship of resources
- Optimize funding for materials, facilities, technology, personnel
- Define and communicate fundraising priorities
- Align organizational structure with strategic priorities
- Assess library’s activities against intended outcomes
